OBJECTIVE

To secure an entry-level position in DevOps where I can utilize my foundational knowledge of automation, cloud technologies, and CI/CD processes, and grow as a professional while contributing to the success of the organization

EXPERTIES

- Version Control **(Git/GitHub)**
- CI/CD **(JENKINS)**
- Cloud Platforms **(AWS)**
- Containerization **(Docker)**
- Orchestration **(Docker swarm,Kubernetes)**
- Infrastructure as Code **(Terraform, Ansible)**
- Monitoring Tools **(Prometheus, Grafana, Nagios)**
- Scripting Languages **(Python, Bash)**

PROJECT

AWS Deployment Project

- Built and containerized a Python app to read data from S3 using Docker.
- Automated deployment of the Docker image to AWS ECR using Jenkins pipelines.
- Integrated the container with AWS Lambda for serverless execution.
- Technologies: **Python**, **Docker**, **Jenkins**, AWS **Lambda**, **S3**, **ECR**.

The c-club

- It's is a group project assigned by HD media company the website is hosted and can see by using following link **http://thecclub.co.in/**

CERTIFICATION

DevTown

- Completed an intensive web development bootcamp, mastering HTML, CSS, and JavaScript.

The c-club

- It was an internship given by HD media company for completing the website which was hosted in google. The language used HTML CSS JS PHP.

VESCON

- The certificate given by VES college where i worked as volunteer in VESCON fest.
